Election/Restrictions

An amendment of 1/18/05 amended claims 28, 32-37 and 45-66, canceled claim 29, and added new claims 67-69.

Claims in the application are 28, 30 and 32-69.

5 Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 28, 30, 32-45 and 67, drawn to a sensor, classified in class 435, subclass 287.1.

10 II. Claims 46-66, 68 and 69, drawn to a solidified protein and an active protein, classified in class 435, subclass 177.

The inventions are distinct, each from the other because:

15 The solidified protein and active protein of the claims of the invention of II can be used other than as part of a sensor as required by the claims of the invention of I. For example, the solidified protein can be used for immobilization of an enzyme or cells, and the active protein can be used for acting on a substrate without being part of a sensor.

20 Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1651

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a
5 non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR
10 1.17(i).
